

Zabed Mahmud

Junior Frontend Developer

+8801979333880 | zabedfolio@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER OBJECTIVE

Passionate and detail-oriented Junior Frontend Developer eager to build performant, user-friendly web applications using modern JavaScript frameworks. Committed to writing clean, scalable code and continuously expanding skills through real-world projects. Seeking an opportunity to contribute meaningfully to a forward-thinking team and grow as a professional developer.

TECHNICAL SKILLS

Languages & Markup: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: React.js, Next.js, Vue.js, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST API

Tools & Version Control: Git, GitHub

Soft Skills: Problem Solving, Team Collaboration, Attention to Detail, Quick Learner

PROJECTS

SportNest – Sports Facility Booking Platform [Live](#) | [Client](#) | [Server](#)

A full-stack sports facility booking platform where users can discover venues, reserve time slots, and manage bookings with secure authentication.

- Users can browse, filter, and view sports facilities with pricing, capacity, and available time slot details.
- Session-based authentication (Better Auth + MongoDB) allows users to register, log in, and access protected booking and management pages securely.
- Real-time slot selection and booking system lets authenticated users reserve specific time slots, with a personal My Bookings dashboard to view and manage reservations.
- Facility owners can list, update, and delete their venues through a dedicated management flow with role-based protected routes.

WanderLust – Travel Booking Platform [Live](#) | [Client](#) | [Server](#)

A full-stack travel booking platform where users can browse destinations, book trips, and manage reservations with Google OAuth and email authentication.

- Users can browse and filter travel packages by category and price, view destination detail pages with highlights, and book trips with a selected departure date.
- Secure authentication supports both email/password and Google OAuth via Better Auth, with session persistence and protected routes across all booking and management pages.
- Authenticated users can view and cancel their reservations from a personal My Bookings dashboard, with booking data stored and retrieved securely from MongoDB Atlas.
- Authorised users can add, edit, and delete travel destinations through a dedicated management flow, with the Express API server secured via JWKS JWT verification.
